

Curriculum Map: 1st Grade Math Envisions 2021-2022

Course: Math1 Sub-topic: General

Grade(s): 1

Course Description: This is a full-year Math Course that covers PA Common Core Standards for first grade students. First grade students will develop concepts and explore connections using manipulatives, number bonds and ten frames during whole and small group instruction. The students will build problem-solving skills and strategies, count, compare, and write numbers to 120, identify and create number patterns, add, subtract, recognize bills and coins, identify fractional parts and symmetry, understand customary measurements of length and weight, read a calendar and identify days of the week, months of the year, seasons, write the date, and tell time, use pictures to show data, and identify, classify, pattern, and sort plane and solid shapes.
